

INLINE® USB-C SWITCH, BIDIRECTIONAL SWITCH, 10GB/S, 100W

This bidirectional USB-C switch from InLine is a manual 2x1 or 1x2 switch for connecting different USB-C devices and is used for power, data and image transfer. The switch can be used flexibly, e.g. one monitor can be connected to two computers or two hard disks to one computer. The connection to the monitor or the hard disk can then be changed at the touch of a button. The bidirectional application option allows you to use this product flexibly. Image transmission up to 4K@60Hz (USB-C, max. 1m), power transmission up to 100 watts (max. 2m), Data transmission up to 10 Gb/s (max. 20cm), 5 Gb/s (up to 1m). Use the switch, for example, to connect a monitor to two computers or two hard disks to one computer.
